

**Show Nureva Span Workspace and Wall to your customers  
today at our Midlands demo facility**

Mountains of Post-it note. Pages of flipcharts. Endless conference calls. These are the common tools of collaboration. But surely there is a better way?

The Nureva Span collaboration system takes these proven processes and fast tracks them into the digital age. Unlimited expansive virtual canvases empower teams to share and explore ideas. Combined with cloud-based Span Workspace, anyone can invite other users to a canvas, and everyone can work together on it in real time, on any device, using known tools and processes.

**It's a collaboration solution designed for the digital generation - familiar, simple, flexible. But how do you communicate this concept to your customers?**

There's no better way than to show it working in a real-world environment. In conjunction with Rapid Technologies we have developed a demonstration room at [\*\*Aston University Engineering Academy in Birmingham\*\*](#). The facility is available free of charge to our partners and shows a Dual Nureva wall in action.

**To book simply call 0800 368 8074 or email  
[enquiries@ascentae.com](mailto:enquiries@ascentae.com) giving at least 7 days' notice**
